Magna Cum Laude

GPA: 3.89 | Major GPA: 3.91

Arcadia University, Granada, Spain

August 2017 - December 2017

RESEARCH EXPERIENCE

Undergraduate Thesis

August 2018 – April 2019

College of Wooster, Wooster, OH

Advisor: Claudia Thompson, Ph. D.

Topic: Expanding the acceptance model of intuitive eating by investigating internalization (SATAQ-3) and exercise type participation as mediators in the model for both men and women.

Research on Emotions and Cognition in Health Lab

Summer 2018

Oklahoma State University, Stillwater, OK

Undergraduate Research Assistant

Supervisor: Misty A.W. Hawkins, Ph. D.

Projects: COSMOS (examining the impact of weight loss interventions versus no-treatment on novel mechanisms that promote obesity and impede its successful treatment, including cognitive function and self-regulatory factors).

- Coded quantitative data, including body composition analyses, surveys, etc.
- Organized and assisted with anthropometric data collection and entry
- Trained with the NIH Toolbox to administer cognitive tasks
- Transported lab bio specimens, such as blood, for testing
- Interaction with participants through data collection
- Conducted literature searches on weight cycling

Child Behavior Lab

Summer 2018

Oklahoma State University, Stillwater, OK

Undergraduate Research Assistant

Supervisor: Maureen Sullivan, Ph. D.

Mentor: Maddison Lynn

Projects: Examining the effects of parenting behaviors and maternal psychopathology on the development of fears in adolescents.

- Organized and assisted with data collection and entry
- Recruited participants through tabling at campus events and flyers
- CITI-certified for responsible conduct of research with human subjects
- Trained in working with minors to complete data collection with child participants

Laboratory of Emotion and Psychophysiology

Summer 2017

Oklahoma State University, Stillwater, OK

Undergraduate Research Assistant

Supervisor: DeMond M. Grant, Ph. D.

Mentor: Danielle L. Taylor, B.A.

Projects: Examining predictors of attentional control and the relationship between anxiety, attentional control, and stimulus-preceding negativity.

- Participant recruitment
- Conducted data collection including; administering cognitive measures, EEG data collection, and collection of saliva samples
- CITI-certified for responsible conduct of research with human subjects
- Conducted extensive literature review
- Developed study idea and subsequent hypotheses
- Statistical analysis and reporting
- Poster presentation

College of Wooster Psychology Department, Wooster, OH

October 2016 – May 2017

Sophomore Research Assistant, College of Wooster

Supervisor: Bryan T. Karazsia, Ph. D.

Projects: Examining internalization of media images over time in comparison to body dissatisfaction over time, using the SATAQ.

- Screen literature involving the SATAQ for study criteria
- Record data from articles which met the study's criteria
- Attend bi-weekly meetings with advisor and other research assistant

TEACHING EXPERIENCE

Statistics and Experimental Design

Fall 2018
